### **Instructions for Using the ECERS--R**

It is important to be accurate in using the ECERS--R whether you use the scale in your own classroom for self-assessment or as an outside observer for program monitoring, program evaluation, program improvement, or research. A video training package for the ECERS--R is available from Teachers College Press for use in self-instruction or as part of group training. It is preferable to participate in a training sequence led by an experienced ECERS--R trainer before using the scale formally. The training sequence for observers who will use the scale for monitoring, evaluation, or research should include at least two practice classroom observations with a small group of observers, followed by an interrater reliability comparison. Anyone who plans to use the scale should read the following instructions carefully before attempting to rate a program.

#### Administration of the Scale

- 1. The scale is designed to be used with one room or one group at a time, for children 2½ through 5 years of age. A block of at least 2 hours should be set aside for observation and rating if you are an outside observer, that is, anyone who is not a member of the teaching staff (i.e., program directors, consultants, licensing personnel, and researchers). An observation of more than 2 hours in duration is preferable.
- 2. Before you begin your observation, complete as much as possible of the identifying information on the top of the first page of the Score Sheet. You may need to ask the teacher for some of the information. By the end of the observation, make sure all the identifying information requested on the first page is complete.
- 3. Take a few minutes at the beginning of your observation to orient yourself to the classroom.
  - You may want to start with Items 1-6 in Space and Furnishings because they are easy to observe.
  - Some items require observation of events and activities that occur only at specific times of the day (i.e., Items 9-12 in Personal Care Routines, Items 7, 8, and 29 covering gross motor play). Be aware of those items so that you can observe and rate them as they occur.
  - Score items that assess interactions only after you have observed for a sufficient time to get a representative picture (i.e., Items 30-33 in Interactions; 34-37 in Program Structure).

• Items 19-28 in Activities will require both inspection of materials and observation of use of materials.

- 4. Be careful not to disrupt the ongoing activities while you are observing.
  - Maintain a pleasant but neutral facial expression.
  - Do not interact with the children unless you see something dangerous that must be handled immediately.
  - Do not talk to or interrupt the staff.
- 5. You need to arrange a time with the teacher to ask questions about indicators you were not able to observe. The teacher should be free of responsibility for children when he or she is answering questions. Approximately 20 minutes will be required for questions. In order to make best use of the time set aside for asking questions:
  - Use the sample questions provided, whenever applicable.
  - If you have to ask questions about items for which no sample questions have been provided, jot your questions down on the Score Sheet or another sheet of paper before talking with the teacher.

#### **Scoring System**

- 1. Read the entire scale carefully, including the Items, Notes for Clarification, and Questions. In order to be accurate, all ratings have to be based as exactly as possible on the indicators provided in the scale items.
- 2. The scale should be kept readily available and consulted frequently during the entire observation to make sure that the scores are assigned accurately.
- 3. Examples that differ from those given in the indicators but seem comparable may be used as a basis for giving credit for an indicator.
- 4. Scores should be based on the current situation that is observed or reported by staff, not on future plans. In the absence of observable information on which

- Ask only those questions needed to decide whether a higher score is possible.
- Ask questions on one item at a time and take notes or decide on a score before you move on to the next item.
- 6. Items with additional notes will be indicated by a #symbol on the bottom of the page.
- 7. Using the CCS-ECERS--R Data Collection Booklet: Take notes as you do the observation. If you have obtained information during the center director interview, record that data before starting the observation. The CCS-ECERS--R Booklet has a box to check near each indicator that is met, as well as numerical scores for the item as a whole.
  - It is advisable to use pencil on the booklet during the observation. The score you finally decide on should be marked clearly.
  - Check each indicator that is met based on observation or reported by the caregiver.
  - The CCS-ECERS--R can be marked to indicate which item(s) you need to ask questions about in order to get additional information. Use the questions that are provided in the CCS-ECERS--R for various indicators. By preparing yourself in this way, questions can be asked systematically in a short period of time. Remember to ask only those questions needed to check the indicators for a score.

If an item is not applicable because it refers to older or younger children than those enrolled, write N/A next to the box. Score the item as if that indicator wasn't there.

- to base your rating, you may use answers given by the staff during the question period to assign scores.
- 5. When scoring an item, always start reading from 1 (inadequate) and progress upward till the correct score is reached.
- 6. Ratings are to be assigned in the following way:
  - A rating of 1 must be given if *any* indicator under 1 is checked.
  - A rating of 2 is given when all indicators under 1 are not checked and at least half of the indicators under 3 are checked.
  - A rating of 3 is given when all indicators under 1 are not checked and all indicators under 3 are checked.

- A rating of 4 is given when all indicators under 3 are met and at least half of the indicators under 5 are checked.
- A rating of 5 is given when all indicators under 5 are checked.
- A rating of 6 is given when all indicators under 5 are met and at least half of the indicators under 7 are checked.
- A rating of 7 is given when all indicators under 7 are checked.
- A score of NA (Not Applicable) may only be given for indicators or for entire items when "NA permitted" is shown on the scale. Indicators that are scored NA are not counted when determining the rating for an item, and items scored NA are not counted when calculating subscale and total scale scores.

#### **Explanations of Terms Used Throughout the Scale**

- Accessible means children can reach and use materials, furnishings, equipment, and so forth. This does not mean that every child has to have access at all times. For example, access may be limited to a certain number of children in an area or limited to certain times of the day. Include distinction between younger and older preschoolers.
- 2. **A substantial portion of the day** means at least one third of the time the children are in attendance. For example, 1 hour out of a 3-hour program, or 3 hours out of a 9-hour program.
- 3. In order to differentiate the meaning of the words "some" and "many," the materials in several items are separated into categories in the Notes for Clarification. For example, gross motor equipment is separated into stationary equipment and portable equipment; fine motor materials are separated into small building toys, art materials, manipulatives, and puzzles; nature/science includes categories or materials such as collections of natural objects, living things, nature/science books, games or toys, and nature/science activities such as cooking and simple experiments.
- 4. **Staff** generally refers to the adults who are directly involved with the children, the teaching staff. In the scale, staff is used in the plural because there is usually more than one staff member working with a group. When individual staff members handle things differently, it is necessary to arrive at a score that characterizes the overall impact on the children of all the staff members. For example, in a room when one staff member is very verbal and the other is relatively nonverbal, the score is determined by how well the children's needs for verbal input are being met.

#### EARLY CHILDHOOD ENVIRONMENT RATING SCALE (EWERS--R)

	CHECK ( ) ALL THAT APPLY THEN CIRCLE ONE RATING FOR EACH ITEM					
	Inadequate	Minimal ② ③	Good  (4)  (5)	Excellent  (6)		
ITEM #1:  SPACE AND FURNISHINGS (INDOOR SPACE)	<ul> <li>1.1 □ Insufficient space for children,# adults, and furnishings #</li> <li>1.2 □ Space lacks adequate lighting, ventilation, temperature control, or sound-absorbing materials#</li> <li>1.3 □ Space in poor repair (e.g., peeling paint on walls and ceiling; rough, damaged floors)</li> <li>1.4 □ Space poorly maintained (e.g., floors left sticky or dirty; trash cans overflowing)</li> </ul>	3.1 □ Sufficient indoor space for children, adults; and furnishings  3.2 □ Adequate lighting, ventilation, temperature control, and sound-absorbing materials  3.3 □ Space in good repair  3.4 □ Space reasonably clean and well maintained#  3.5 □ Space is accessible to all children and adults	5.1 □ Ample indoor space that allows children and adults to move around freely (e.g., furnishings do not limit children's movement; sufficient space for equipment needed by children with disabilities)#  5.2 □ Good ventilation, some natural lighting through windows or skylight  5.3 □ Space is accessible to children and adults	<ul> <li>7.1 □ Natural light can be controlled (e.g., adjustable blinds or curtains)</li> <li>7.2 □ Ventilation can be controlled (e.g., windows can open; ventilating fan used by staff)#</li> </ul>		
*Notes continued on reverse page.		currently using the classroom (e.g., ramps and handrails, access for wheelchairs) NA permitted	with disabilities# <i>NA not permitted</i>			

- Base space needs on largest number of children attending at one time.
- If a classroom is terribly noisy, so that conversations are difficult and noise levels are obviously uncomfortable for classroom users, then do not give credit for 1.3 adequate sound-absorbing materials, even if a number of such materials are present. If noise typically is not at a comfortable level, for whatever reason, the sound absorbing materials are not effective enough. This is true even if the noise is not actually coming from within the classroom being observe.
- It is expected that there will be some messiness from the regular activities of the day. "Reasonably clean" means that there is evidence of daily maintenance, such as floors being swept and mopped, and that big messes, such as juice spills, are cleaned up promptly.

ITEM #2:	☐ Insufficient basic furniture for	□ Sufficient furniture for	■ Most furniture is child-	₁ ☐ Routine care furniture is
	routine care, play, and learning (e.g.,	routine care, play, and	sized#	convenient to use $(e.g.,$
FURNITURE FOR	not enough chairs for all children to	learning		cots/mats stored for easy

	CHECK (✔) ALL THAT APPLY THEN CIRCLE ONE RATING FOR EACH ITEM							
	Inadequate	Minimal	Good	Excellent				
	①	2 3	4 5	6 7				
ROUTINE CARE,	use at the same time; very few open		<sup>2</sup> □ All furniture is sturdy	access)				
PLAY, AND	shelves for toys)	2 ☐ Most furniture is sturdy	and in good repair					
LEARNING		and in good repair#		<sup>2</sup> □ Woodwork bench,				
Basic furniture: tables and chairs used for meals/ snacks and activities; mats or cots for rest or nap; cubbies or other storage for children's things; low open shelves for play/learning	2 ☐ Furniture is generally in such poor repair that children could be injured (e.g., splinters or exposed nails, wobbly legs on chairs)	Children with disabilities have the adaptive furniture they need (e.g., adaptive chairs or bolsters are available for children with physical disabilities)#  NA permitted	3 □ Adaptive furniture permits inclusion of children with disabilities† with peers (e.g., child using special chair can sit at table with others)  NA permitted	sand/water table, or easel used				

- To be given credit for low open shelves, they must be used for toys and materials that children can reach by themselves.
- Sturdiness is a property of the furniture itself (i.e., will not break, fall over or collapse when used). If sturdy furniture is placed so that it can be easily knocked over, this is a problem with safety, not the sturdiness of the furniture.
- 1.3 If there are no children with disabilities enrolled or if children with disabilities do not need adaptive furniture, mark NA for 3.3 and 5.3.
- .1 Since children are different sizes at different ages, the intent here is that furniture should be the right size for the children in care. Furniture that is smaller than adult-sized may be the right size for a 6- or 7-year-old, but not small enough for a 2- or 3-year-old. For chairs to be considered child-sized, the children's feet must rest on the floor when seated. Table height should allow children's knees to fit under the table and elbows to be above the table.

**ITEM #3:** ☐ No soft furnishings accessible to □ Some soft furnishings □ Cozy area accessible to □ Soft furnishings in children (e.g., upholstered furniture, accessible to children children for a substantial addition to cozy area **FURNISHINGS** cushions, rugs, bean bag chair)# (e.g., carpeted play portion of the day# accessible to children (e.g., cushions in dramatic FOR RELAXATION space, cushions) 2 ☐ No soft toys accessible to children <sup>2</sup> □ Cozy area is not used for play area, several rug AND COMFORT# (e.g., stuffed animals, soft dolls) <sup>2</sup> □ Some soft toys accessible active physical play# areas or wall-to-wall to children carpeting) 3 ☐ Most soft furnishings are clean and in good repair <sup>2</sup> ☐ Many clean, soft toys accessible to children

- Furnishings for relaxation and comfort means softness provided for children during learning and play activities. Routine care furnishings such as cots, blankets and pillows used for naps are not considered when scoring this item.
- .1 See "Explanation of Terms Used Throughout the Scale" (p. ii) for the definition of "accessible."

CHECK (✔) ALL THAT APPLY THEN CIRCLE ONE RATING FOR EACH ITEM							
Inadequate	2	Minimal  ③	4	Good (5)	6	Excellent 7	

- 1.1& A cozy area is a clearly defined space with a substantial amount of softness where children may lounge, daydream, read, or play quietly. For example, it might consist
- .2 soft rug with several cushions, an upholstered couch, or a covered mattress with cushions. If there are 2 or more cozy areas, each area does not need to meet the requirements of these indicators. However, there must always be one are, providing a substantial amount of softness where children can depend on being able to relax, that is not used for active physical play. It must obvious that a child who wants to use a cozy area will not be constantly interrupted by other actively playing children. A combination of all areas can be used to judge whether a cozy area is accessible for a substantial portion of the day.
- .1 See "Explanation of Terms Used Throughout the Scale" (p. ii) for the definition of "a substantial portion of the day."
- The cozy area may be used for short periods as a group space (e.g., for dancing or circle time) but it should be protected from active play for most of the day. It should be away from active play equipment and have (through placement or a barrier) protection from active children. It should not be located where there is a lot of traffic. Staff should be diligent to ensure that active children do not interfere with a child in the cozy area by jumping on or running into the child who is relaxing.

ITEM #4:	.₁ □ No interest centers defined#	₁ ☐ At least two interest centers defined	☐ At least three interest centers defined and	☐ At least five different interest centers provide a
ROOM ARRANGEMENT FOR PLAY	<sup>2</sup> □ Visual supervision of play area is very difficult	<sup>2</sup> □ Visual supervision of play area is not difficult	conveniently equipped (e.g., water provided near art area; shelving	variety of learning experiences
		3 ☐ Sufficient space for several activities to go on	adequate for blocks and manipulatives)	<sup>2</sup> □ Centers are organized for independent use by children (e.g., labeled
		at once (e.g., floor space for blocks, table space for manipulatives, easel for art)	2 ☐ Quiet and active centers placed to not interfere with one another (e.g., reading or listening area separated from blocks or housekeeping)#	open shelves; labeled containers for toys; open shelves are not overcrowded; play space near toy storage)#
		<sup>4</sup> ☐ Most spaces for play are accessible to children with disabilities enrolled in the group  NA permitted	3 □ Space is arranged so most activities are not interrupted (e.g., shelves placed so children walk around, not through, activities)#	3 ☐ Additional materials available to add to or change centers

**ROBE:** 7.3 Are there any additional materials available that you add to the interest centers?

- .1 An interest center is an area where materials, organized by type, are stored so that they are accessible to children, and appropriately furnished play space is provided for children to participate in a particular kind of play. Examples are: art activities, blocks, dramatic play, reading, nature/science, and manipulatives/fine motor.
- Look for a separation in physical space, actual distance between active or noisy centers and the more quiet centers. A barrier, such as open shelves, isn't sufficient.

			outdoor area)#	outdoor area)#  3 □ S  tl  a  w  p		outdoor area)#  disabilities)  sur  wit  Space is organized so dro  that different types of  activities do not interfere with one another (e.g., fea  play with wheel toys toil  separated from acc  climbing)#  has

- The intent of this is that the major causes of serious injury are minimized, such as injury from falls, entrapment, pinching of body parts, and protrusions from equipment. A space can be considered generally safe even if it cannot be easily supervised. The ability to supervise space is not considered in this item.
- For a rating of 5, space must be adequate for the size of the group using the area. Find out if class groups rotate or if several groups use the space at the same time. Some indoor space must be available for use for gross motor play, especially in bad weather. This space may usually be used for other activities. When required by environmental conditions (e.g., extreme weather or pollution; dangerous social conditions), facilities may be given a 5 if they have adequate space indoors and some space outdoors.
- To score this indicator, observe to see that the various activities in the gross motor space do not interfere with each other (for example, that children are not in great danger of tripping over toys as they run across the space, the children coming down a slide will not run into anything, or that wheel toys do not usually go through areas of other types of play and "run people down").

	,			
ITEM #8:	□ Very little gross motor equipment used for play	☐ Some gross motor equipment accessible to	☐ There is enough gross motor equipment so that	☐ Both stationary and portable gross motor

			p g	pecial equipment provided for children group with disabilitys TA permitted					

- Examples of gross motor equipment: *stationary equipment* such as swings, slides, climbing equipment, overhead ladders; *portable equipment* such as balls and sports equipment, wheel toys, tumbling mats, jump ropes, bean bags, and ring toss game. When rating gross motor equipment, consider equipment both indoors and outdoors.
- For programs of 4 hours or less, at least half an hour of access is required.
- .3 In a mixed-aged group, appropriate equipment must be available for the different abilities represented. Consider especially the appropriateness of the stationary equipment such as climbers, since they are permanent installations and always accessible.
- Adaptations include physical modifications to existing equipment or specially designed equipment as well as help from staff to enable children with disabilities to have gross motor experiences similar to those of their peers. Score NA if no children requiring adaptations are enrolled in the group being observed.
- '.2 Consider ages of children and what would challenge them to determine whether equipment stimulates skills on different levels.

ITEM #9: GREETING/ DEPARTING#	<ul> <li>□ Greeting of children is often neglected</li> <li>□ Departure not well organized</li> </ul>	■ Most children greeted warmly (e.g., staff seem pleased to see children, smile, use pleasant tone of voice)	a Each child is greeted individually (e.g., staff say "hello" and use child's name; use child's	□ When they arrive, children are helped to become involved in activities, if needed  □ When they arrive, children are helped to become involved in activities.  □ When they arrive, children are helped to become involved in activities.  □ When they arrive, children are helped to become involved in activities.  □ When they arrive, children are helped to become involved in activities.  □ When they arrive, children are helped to become involved in activities.  □ When they arrive in the properties of the propert

DIAPERING	sanitized after each use, toilets rarely flushed)#  2 □ Lack of basic provisions interferes with care of children# (e.g., no toilet paper or soap; same towel used by many children; no running water in area)  3 □ Handwashing often neglected by staff or children after toileting/ diapering#  4 □ Inadequate or unpleasant supervision or children#	<ul> <li>2 □ Basic provisions made for care of children</li> <li>3 □ Staff and children wash hands most of the time after toileting#</li> <li>4 □ Toileting schedule meets individual needs of children</li> <li>5 □ Adequate supervision for age and abilities of children#</li> </ul>	running water near diapering table and toilets; easy to clean surfaces)#  2 □ Provisions convenient and accessible for children in group (e.g., steps near sink or toilet if needed; handrail for child with physical disability; toileting area adjacent to room)  3 □ Pleasant staff-child interaction	2 □ Self-help skills promoted as children are ready			

- .1 & If the same sink is used by either children or adults for both diapering/toileting and food-related routines (including toothbrushing) or to wash toys/other classroom
- equipment, it must be sanitized by spraying sink and faucets with a bleach solution after diapering/toileting. If the facility permits sinks to be designated for specific purposes, then this should be done (for example, sinks near toilets should be used for toileting handwashing, while sinks in classroom are used for food-related purposes). If children use toilet, wash hands and then immediately sit down for meal/snack, contamination of children's hands at toileting sink must be minimized, for example by having children turn off water with paper towel or having adult turn off faucets. However, children do not have to wash their hands twice--once at the toilet sink and once at the food sink.
- .2 In case special procedures are required such as diapering for an older child or catheterization, they must be handle in a sanitary manner that preserves the child's dignity.
- .3 Assume that the handwashing seen during the observation is typical of what happens throughout the day. Base your ratings for 1.3 and 3.3 on what you see. Give credit for 3.3 if adults' and children's hands are washed 75% of times when needed. Adults' hands must be washed even if gloves are used.
- .4 Inadequate supervision means that staff do not monitor to protect the safety of the children or to ensure that sanitary procedures (e.g., handwashing) are carried out.
- 75% of children's hands washed and 75% of adults hands washed.
- .5 Adequate supervision means that teachers check to be sure that toilet sanitary conditions are maintained (ex. toilets flushed, toilet paper/towers and soap provided) and that teachers ensure children complete sanitary procedures properly (ex. wipe properly, wash hands).
- 3.1 Since potty chairs are a health hazard, they should be avoided for general use. In the rare case when special need requires the use of a potty, credit toward a score of 5 may be given if the potty is used only for the child with a special need and is disinfected after each use.
- '.1 Child-sized sinks and toilets are fixtures that are considerably smaller or lower than regular-sized fixtures, and can be used comfortably by children without modifications such as toilet seats and steps, by at least 75% of children in group.

	g	roup#		(e.g., small figures and animals in block area; puppets and flannel board pieces in book area; toys for dramatic play outdoors or indoors)		spoken communication with written language (e.g., write down what children dictate and read it back to them; help them write note to parents)				

#### PROBE:

- 7.2 Do you do anything to help children see that what they say can be written down and read by others? Please give some examples.
- Children of different ages and abilities or those speaking a primary language different from the primary language of the classroom require different methods to encourage communication. Suitable activities must be included for children speaking a different primary language or those requiring alternative communication methods, such as signing or the use of augmentative communication devices.
- Activities used by staff to encourage children to communicate require that staff take action to draw communication from a child. During free play, for example, the teacher might ask the child to talk about what he/she is doing or making. During circle time, finger plays, songs, reciting nursery rhymes, or helping to tell a story would count towards meeting this indicator.
- If words to songs, poems, and/or chants, etc., that are violent, sexually explicit or culturally biased, are observed this is considered inappropriate; therefore, score this indicator, "No".

**ITEM #17:** ☐ Staff do not talk with children about ₁ ☐ Staff sometimes talk □ Staff talk about logical □ Staff encourage children logical relationships (e.g., ignore about logical relationships while to reason throughout the USING children's questions and curiosity relationships or concepts children play with day, using actual events LANGUAGE TO about why things happen, do not call (e.g., explain that outside materials that stimulate and experiences as a basis DEVELOP attention to sequence of daily events, time comes after snacks, reasoning (e.g., sequence for concept development REASONING cards, same/ differences and similarity in number, point out differences in (e.g., children learn **SKILLS** size, shape; cause and effect) sizes of blocks child different games, size and sequence by talking about their experiences in the used) shape toys, sorting 2 ☐ Concepts are introduced games, number and math daily routine or recalling inappropriately (e.g., concepts too 2 ☐ Some concepts are the sequence of a cooking games)# difficult for age and abilities of introduced appropriately project) children; inappropriate teaching for ages and abilities of 2 ☐ Children encouraged to methods used such as worksheets children in group, using talk through or explain 2 ☐ Concepts are introduced in their reasoning when without any concrete experiences; words and concrete response to children's teacher gives answers without experiences (e.g., guide solving problems (e.g., interests or needs to solve helping children to figure things children with questions why they sorted objects problems (e.g., talk and words to sort big into different groups; in children through

tapes or music on a computer program that has extensive musical content, e.g. complete songs, and/or passages of music. Do not give credit for very short musical sound patterns on the computer, as found in many computer games. Dance props must be accompanied by something that makes music such as a recorded music, child-created music, or adult created music. For a tape player to be considered accessible in a group of older children (majority of children are 4 years and older) children should be able to use the tapes independently, but in younger groups help may be needed from the teacher.

The "many" music materials must be "accessible" for at least 30 minutes daily to give credit for this indicator.

TIME FOR this indicator, "  DIAME FOR S.:  Blocks are materials  suitable for building sizeable structures.  Types of blocks are  unit blocks (wooden or  plastic, including	occasionally" means at least 3-4 times per  □ Few blocks are accessible for children's play	accessories† are accessible for at least two children to build independent structures at the same time (e.g., toy people, animals, vehicles, and road signs)	<ul> <li>□ Enough space, blocks and accessories are accessible for three or more children to build at the same time#</li> <li>□ Blocks and accessories are organized according</li> </ul>	all □ At least two types of blocks and a variety of accessories accessible daily (e.g., large and small; homemade and commercial)  □ Blocks and accessories are
		<ul> <li>2 □ Some clear floor space used for block play</li> <li>3 □ Blocks and accessories</li> </ul>	to type  3   Special block area set aside out of traffic, with storage and suitable	stored on open, labeled shelves (e.g., labeled with picture or outline of blocks)

			accessible for daily use		building surface (e.g., flat rug or other steady surface)#	.3	☐ Some block play available outdoors		
				.2	□ Block area accessible for play for a substantial portion of the day#				
		.1.1							
	n is block play available? About how long aildren play with blocks outdoors?	are the b	blocks available for play?						
This indicator requi	ires enough blocks for 3 children to build sing this area then imagine how it would be								

- The block area may include other types of small blocks rated under Item 19, in addition to blocks, and still be given credit for being a special block area. Credit cannot be given if other materials, such as other find motor toys, art materials, pretend play materials, carpentry tools, etc. are included with the blocks.
- 1.4 If two or more block areas are considered in calculating accessibility for a substantial part of the day, all block areas must meet requirements of 5.1-5.3 to be counted. The other block area may be outdoors or in another indoor space.

#### CHECK ( ) ALL THAT APPLY THEN CIRCLE ONE RATING FOR EACH ITEM Excellent Inadequate Minimal Good (1) (3) (5) 6 (7)**ROBES:** 3.1 Do you use sand or water with the children? How is this handled? About how often? Where is this available? 3.2 Are there any toys for children to use with sand or water play? Please describe them. 7.2 Do you change the activities children do with sand and water? "Provision" for sand and water requires action on the part of staff to provide appropriate materials for such play. Allowing children to play in puddles or dig in the dirt on the playground does not meet the requirements of this item. Each room does not have to have its own sand and water table, but must be able to use a sand and water table regularly if it is shared with another room. 1.1 For "variety," consider the differences among the toys that children can use. Variety is represented in toy characteristics, such as use, size, transparency level, shape, color, and these types of properties should be considered, but use of the toys is of prime important in making a scoring decision. If there are duplicates of one toy (e.g., many spoons), then the requirements for variety are not met. Variety in toys does not have to be provided all at one time-variety can be provided through regular rotation of toys. If teacher reports that toys are rotated, ask to see the other toys, and find out how they are rotated. If both sand and water are accessible, variety in toys must be provided for both, but the same toys can be used to meet the requirement. Number of toys accessible for play is also considered when determining "variety." For example, when fewer children use the toys at one time. '.1 Separate provisions for indoor use and outdoor use must be provided to give credit for this indicator. Giving credit can not depend on a teacher's moving one provision (e.g., a sand/water table) from indoors to outdoors every day. TEME#24:S <sup>1</sup> □ No materials or equipment accessible □ Some dramatic play □ Many dramatic play □ Materials rotated for a Housekeeping (e.g., for dress up or dramatic play materials and furniture materials accessible, variety of themes (e.g., accessible, so children including dress-up prop boxes for work, can act out family roles fantasy, and leisure clothes# kitchen utensils); themselves (e.g., dressthemes) different kinds of work (e.g., office, up clothes, housekeeping 2 ☐ Materials accessible for a substantial portion of the props, dolls) 2 ☐ Props provided to day# represent diversity (e.g., 2 ☐ Materials are accessible props representing for at least 1 hour daily 3 ☐ Props for at least two various cultures; different themes equipment used by people 3 ☐ Separate storage of accessible daily (e.g., with disabilities)# dramatic play materials housekeeping and work)# 3 ☐ Props provided for active <sup>4</sup> □ Dramatic play area dramatic play outdoors clearly defined, with space to play and <sup>4</sup> □ Pictures, stories, and trips

			3 ☐ Most supervision is non-punitive, and control is exercised in a reasonable way		involved in play, help child complete puzzle)  3 □ Staff show awareness of the whole group even when working with one child or a small group (e.g., staff frequently scan room when working with one child, make sure area not visible is supervised by other staff)  4 □ Staff show appreciation of children's efforts and accomplishments		painting before being asked to talk about it; child allowed to discover that his/her block building is unbalanced when it falls)	
ITEM #31: DISCIPLINE	<ul> <li>Children are controlled with severe methods (e.g., spanking, shouting, confining children for long periods, or withholding food)</li> <li>Discipline is so lax that there is little order or control</li> <li>Expectations for behavior are largely inappropriate for age and developmental level of children (e.g., everyone must be quiet at meals; children must wait quietly for long periods of time)</li> </ul>		Staff do not use physical punishment or severe methods  Staff usually maintain enough control to prevent children from hurting one another  Expectations for behavior are largely appropriate for age and developmental level of children		Staff use non-punitive discipline methods effectively (e.g., giving attention for positive behaviors; redirecting child from unacceptable to acceptable activity)  2 □ Program is set up to avoid conflict and promote age-appropriate interaction (e.g., duplicate toys accessible; child with favorite toy given protected play place)  3 □ Staff react consistently to children's behavior (e.g., different staff apply same rules and use same methods; basic rules	:	Staff actively involve children in solving their conflicts and problems (e.g., help children talk about problems and think of solutions; sensitize children to feelings of others)  Staff use activities to help children understand social skills (e.g., use storybooks and group discussions with children to work through common conflicts)  Staff seek advice from other professionals concerning behavior problems#	

	CHECK (✔) ALL THAT APPLY THEN CIRCLE ONE RATING FOR EACH ITEM							
Inad	equate  (2)	Minimal  ③	4	Good (5)	6	Excellent		
				followed with all children)#				
<b>PROBES:</b> 1.1 Do you ever find it necessary use.	to use strict discipline? Please des	cribe the methods you		Do you use activities with the along well with each other?	children that er	ncourage them to get	=	
There needs to be general consistency a				What do you do if a child has	•	-		

- .3 There needs to be general consistency among staff members in the way they handle different situations and children. This does not mean that there can be no flexibility. Basic rules for positive social interaction in a group, such as no hitting or hurting, respect for others and for materials, should always be followed. A specialized program may be needed to help a child with a disability follow basic classroom rules.
- 1.3 In most cases "other professionals" means someone from outside the program who specializes in the area of concern. In a few cases, a program staff member can count as the "other professional" if the person has educational qualifications that go beyond those of a typical child care staff member.

1	in the person has concurrent quantitations			i
ITEM #32: STAFF-CHILD INTERACTIONS#	Staff members are not responsive to or not involved with children (e.g., ignore children, staff seem distant or cold)  Interactions are unpleasant (e.g., voices sound strained and irritable)  Physical contact used principally for control (e.g., hurrying children along) or inappropriately (e.g., unwanted hugs or tickling)	Staff usually respond to children in a warm, supportive manner (e.g., staff and children seem relaxed, voices cheerful, frequent smiling)  □ Few, if any, unpleasant interactions	Staff show warmth through appropriate physical contact (e.g., pat child on the back, return child's hug)  2 □ Staff show respect for children (e.g., listen attentively, make eye contact, treat children fairly, do not discriminate)	staff seem to enjoy being with the children  2 □ Staff encourage the development of mutual respect between children and adults (e.g., staff wait until children finish asking questions before answering; encourage children in a polite way to listen when adults speak)
			3 ☐ Staff respond sympathetically to help children who are upset, hurt or angry#	

- While the indicators for quality in this item generally hold true across a diversity of cultures and individuals, the ways in which they are expressed may differ. For example, direct eye contact in some cultures is a sign of respect, in others, a sign of disrespect. Similarly, some individuals are more likely to smile and be demonstrative than others. However, the requirements of the indicators must be met, although there can be some variation in the way this is done.
- Sympathetic response means that staff notice and validate a child's feelings, even if the child is showing emotions that are often considered unacceptable, such as anger or impatience. The feelings should be accepted although inappropriate behaviors, such as hitting or throwing things, should not be allowed. A sympathetic response should be provided in most, but not necessarily all, cases. If children are able to solve minor problems themselves, then teacher response is not needed. The observer needs to get an

#### CHECK ( ) ALL THAT APPLY THEN CIRCLE ONE RATING FOR EACH ITEM Excellent Inadequate **Minimal** Good (1) (2)(3) (4) (5) 6 (7)overall impression of response of the staff. If minor problems persist and are ignored or if staff responds in an unsympathetic manner, give no credit for this indicator. **ITEM #33:** ☐ Interaction among children (peers) □ Peer interaction □ Staff model good social ☐ Peer interactions usually not encouraged (e.g., talking with encouraged (e.g., skills (e.g., are kind to positive (e.g., older INTERACTIONS peers discouraged, few opportunities children allowed to move others, listen, empathize, children often cooperate for children to choose own **AMONG** freely so natural cooperate) and share: children **CHILDREN** playmates) groupings and generally play well 2 ☐ Staff help children together without fighting) interactions can occur) 2 ☐ Little or no staff guidance for develop appropriate positive peer interaction 2 ☐ Staff stop negative social behavior with 2 ☐ Staff provide some and hurtful peer peers (e.g., help children opportunities for children 3 ☐ Little or no positive peer interaction talk through conflicts to work together to interactions (e.g., stop (e.g., teasing, bickering, fighting are name calling, fighting) instead of fighting; complete a task (e.g., a encourage socially group of children work to common) ₃ □ Some positive peer isolated children to find cover a large mural paper interaction occurs friends; help children with many drawings; understand feelings of make a soup with many ingredients; cooperate to others) bring chairs to table) **ROBE:** 7.2 Are there any activities you use that encourage children to work together? Could you give me some examples? ITEM #34: ☐ Schedule is *either* too rigid, leaving □ Basic daily schedule □ Schedule provides □ Smooth transitions no time for individual interests, or exists that is familiar to balance of structure and between daily events (e.g., **SCHEDULE** too flexible (chaotic), lacking a children (e.g., routines flexibility (e.g., regularly materials ready for next dependable sequence of daily and activities occur in scheduled outdoor play activity before current relatively the same period may be activity ends: most events# sequence most days) lengthened in good transitions handled a few weather) children at a time rather 2 ☐ Written schedule is than whole group) posted in room and 2 □ A variety of play relates generally to what activities occur each day, 2 ☐ Variations made in occurs# some teacher directed schedule to meet and some child initiated individual needs (e.g., 3 ☐ At least one indoor and shorter story time for one outdoor play period 3 ☐ A substantial portion of child with short attention (weather permitting) the day is used for play span; child working on occurs daily activities project allowed to continue past scheduled 4 ☐ Both gross motor and <sup>4</sup> □ No long period of time: slow eater may

		CHECK (✔) ALL THAT APPLY THEN CIRCLE ONE RATING FOR EACH ITEM							
		Inadequate  ①	2	Minimal  ③	4	Good (5)	6	Excellent	
				less active play occur daily		waiting during transitions between daily events#		finish at own pace)	
ROBES:	3.2-3.3	If outdoor play is not on the schedule and you do not observe it, you must ask whether the schedule includes an outdoor play period.							
	3.4	If you only observe one type of play, ask if the other occurs.							
	7.2	If you saw no evidence of variations in schedule ask: Do you vary the schedule to meet individual needs such as feeding a hungry child early or allowing a tired child to rest before the whole group has a nap?							

- 1 Daily events refer to time for indoor and outdoor play activities as well as routines such as meals/snacks, nap/rest, and greeting/departing.
- The written schedule need not be followed to the minute. The intent of this indicator is that the general sequence of events is being followed. Schedule must be posted in the room to get credit. Outside the door is not sufficient since schedules must be accessible to substitutes and new staff.
- "Long period of waiting" means waiting without any activity for three minutes or more, (e.g., running around aimlessly, whole group sitting at tables waiting for lunch, waiting in line to go out or to use the bathroom). Note that this indicator refers to waiting between transitions from one activity to another, rather than waiting within any activity.

ITEM #35: FREE PLAY	<ul> <li>□ Either little opportunity for free play or much of day spent in unsupervised free play</li> <li>□ Inadequate toys, games, and equipment provided for children to use in free play</li> </ul>	aily indoors and outdoors, weather permitting  2 □ Supervision provided to protect children's health and safety#  3 □ Some toys, games, and equipment accessible for children to use in free play	<ul> <li>□ Free play occurs for a substantial portion of the day both indoors and outdoors (e.g., several free play periods scheduled daily)</li> <li>□ Supervision provided to facilitate children's play (e.g., staff help children get materials they need; help children use materials that are hard to manage)</li> <li>□ Ample and varied toys, games, and equipment provided for free play</li> </ul>	□ Supervision used as an educational interaction (e.g., staff help children think through solutions to conflicts, encourage children to talk about activities, introduce concepts in relation to play)  □ New materials/ experiences for free play added periodically (e.g., materials rotated; activities added in response to children's interests)
PROBES:				

		Inadequate	2	Minimal  ③	4	Good (5)	6	Excellent  (7)		
	Could you describe	e any free play opportunities the children m	ight have? W	Then and where do the	se occur? Wh	nat can children play with	?			
.2	Are new free play materials/experiences ever added/changed? If so, ask: How often?									
	Child is permitted to select materials and companions, and as far as possible manage play independently. Adult interaction is in response to child's needs. Situations in which children are assigned to centers by staff or staff select the materials that individual children may use do not count as free play.									
	Ensuring that health and safety requirements are met occurs in "Toileting/diapering", "Meals/snacks" and "Health practices" in "Space for gross motor play" and "Safety practices." This indicator, as part of the "Free play" item, is to ensure that children are supervised to minimize major hazards to children's health and safety (e.g., children are supervised so that they do not play with matches or swallow poisons, etc.). Do not score <i>No</i> unless supervision during free play is extremely lax.									
	M #36: DUP TIME	Children kept together as whole group most of the day (e.g., all do same art project, have story read to them, listen to records, use bathroom at the same time)  Uery few opportunities for staff to interact with individual children or small groups#	in inc 2 □ So ch se	ome play activities don- small groups or dividually ome opportunity for ildren to be a part of lf-selected small oups	2 □	Whole-group gatherings† limited to short periods, suited to age and individual needs of children#  Many play activities done in small groups or individually  Some routines done in small groups or individually	2 🗖	Different groupings provide a change of pace throughout the day  Staff engage in educational interaction with small groups and individual children as well as with the whole group (e.g., read story, help small group with cooking or science activity)#  Many opportunities for children to be a part of self-selected small groups		
		mall groups may change with the age and incen, whereas for 4- and 5-year-olds, five-to-e				eloping 2- and 3-year-olds	, a suitable	small group might be		
	Whole-group gatherings may not be suitable for children under 3½ years of age or some children with special needs. If this is the case, no group gatherings are required for a 5, and credit should be given for this indicator. One way to determine whether the whole-group gathering is suitable is whether the children remain interested and involved.									
	To give credit for this indicator, the assessor must observe to get a general impression of what the children experience. One staff might be stronger in educational interaction than another, but if the stronger teacher is strong enough, credit can be given.									
	M #37: OVISIONS FOR	No attempt by staff to assess children's needs or find out about available assessments	fre	aff have information om available sessments		Staff follow through with activities and interactions recommended by other		Most of the professional intervention is carried out within the regular

WAY THAT RESEMBLES WORDS AND/OR LETTERS; THESE ATTEMPTS MAY INCLUDE SCRIBBLING, BUT THE SCRIBBLING MUST BE INTENTIONAL AND THE CHILD SHOULD INDICATE WHAT HE OR SHE WROTE OR INTENDED TO WRITE.

2. WHAT WAS THE TOTAL NUMBER OF MINUTES THE FOCUS CHILD ENGAGED IN A READING ACTIVITY?

INTERVIEWER: READING ACTIVITIES INCLUDE LOOKING
THROUGH A BOOK, TELLING ANOTHER ADULT
OR CHILD THE STORY WHILE FLIPPING
THROUGH A BOOK, PLAYING A COMPUTER
GAME THAT INVOLVES WORDS OR LETTERS,
PARTICIPATING IN A FULL-GROUP, SMALL-

# GROUP, OR ONE-TO-ONE BOOK-READING SESSION WITH AN ADULT.

3. WHAT WAS THE TOTAL NUMBER OF MINUTES THE FOCUS CHILD SPENT WATCHING TV?

4. WHAT WAS THE TOTAL NUMBER OF MINUTES THE FOCUS CHILD SPENT WANDERING AIMLESSLY?

5. WHAT WAS THE TOTAL NUMBER OF MINUTES THE FOCUS CHILD SPENT UPSET OR CRYING?

6. WHAT WAS THE TOTAL NUMBER OF TIMES THE FOCUS CHILD BECAME UPSET OR CRIED?

7. WHAT WAS THE TOTAL NUMBER OF MINUTES THE FOCUS PROVIDER SPENT NOT INTERACTING WITH ANY CHILDREN?

INTERVIEWER: THIS INCLUDES THE FOCUS PROVIDER AND ALL CHILDREN WHO WERE PRESENT. INCLUDE TIME SPENT WATCHING TV, TALKING ON TELEPHONE. DO NOT INCLUDE ROUTINE TASKS THAT ARE REQUIRED SUCH AS PREPARING MEALS FOR CHILDREN OR CLEANING UP AFTER THEM.

- To assess whether indoor space is "ample," consider the various activity areas as well as routine care areas. For example, look to see if the block or housekeeping allow plenty of free movement for children to play, as well as for storage and use of the materials and equipment needed in the area. Do not give credit for areas ample space if 2 activity areas are crowded, even if there is ample space for routines.
- In order for the indoor space to be considered minimally acceptable, it must be accessible to children and adults with disabilities who are currently a part of the program. If no children or adults with disabilities are currently part of the program, score NA for indicator 3.5. For a score of 5, accessibility is required regardless of whether or not individuals with disabilities are involved in the program. Therefore only a score of N or Y is allowed for 5.3.
- 7.2 Doors to outside count as ventilation control only if they can be left open without posing a safety threat (for example, if they have a locking screen door or safety gate to keep children from leaving the room unattended).

To determine nutritional adequacy, refer to nutrition guidelines. Check menu for the week in addition to observing food served. An occasional instance of not meeting the guidelines--for example, cupcakes for a birthday party instead of the scheduled snack--should not affect the rating. If no menu is available, ask the teacher to describe meals/snacks served for the past week.

- Morning snacks for 3- to 5-year-olds should include two of the following four food components:
  - ½ cup milk
  - ½ ounce of lean meat, fish, or poultry (cooked lean meat without bone)
    - OR ½ ounce cheese
    - OR 1 egg
    - OR 1/4 cup cooked dry beans or peas,
    - OR 2 tablespoons peanut butter
    - OR ½ ounce nuts and/or seeds
    - OR 1/4 cup yogurt
  - ½ cup juice (full strength) or fruit or vegetable
  - ½ slice bread and/or cereal (whole grain or enriched) (1/3 cup cold/dry cereal or 1/4 cup hot/cooked cereal).
- Lunch or supper for 3- to 5-year-olds should include one of each of the following four food components:
  - 3/4 cup milk
  - 1½ ounces of lean meat, fish, or poultry (lean meat without bone)

# OR 11/2 ounce cheese

- OR 1 egg
- OR 3/8 cup cooked dry beans or peas,
- OR 3 tablespoons peanut butter
- OR 3/4 ounce nuts and/or seeds\*\*
- ½ cup juice (full strength) or fruit or vegetable
- ½ slice bread or bread alternate (whole-grain or enriched)

\*\*(This portion of nuts or seeds can meet only one-half of the total serving of the meat/meat alternate requirement for lunch or supper. Nuts or seeds must be combined with another meat/meat alternative to fulfill the requirement. For determining combinations, 1 ounce of nuts or seeds is equal to 1 ounce of cooked meat, poultry or fish).

Caution: Children under 5 are at the highest risk of choking. Any nuts and/or seeds must be served to them in a prepared food and be ground or finely chopped.

- † If sanitary conditions are usually maintained and if handwashing and other sanitary procedures are clearly a part of the program, credit can be given for 3.3 even if there is an occasional lapse in practice.
- ‡ Although staff may need to leave the table to assist with the meal, most of the time should be spent sitting with the children. It is not required that each table have a staff member. Some staff may help with serving, while others sit with children.

- 3.1 Adequate handwashing means that hands are washed thoroughly with soap and running water, and dried with a towel that is not shared, or hands are air dried with a blower. Since handwashing at mealtimes and after toileting is handled in other items, rate 3.1 based on all other handwashing required. Give credit for 3.1 only if you observe that hands are washed 75% of times when needed. Antiseptic waterless wash or wipes may be used when necessary, such as when wiping noses on the playground.
- 3.2 Examples for this indicator include:
  - tissues available and used when necessary
  - same washcloth/towel not used for more than one child
  - children wash hands if soiled after outdoor play, messy activities
  - soap available and used
  - toothbrushes stored to avoid contamination
- 7.1 Score NA for programs open 6 hours or less per day.
- 7.2 If the "same sink" is used for both toothbrushing and toileting, without sanitizing.

- 3.2 Reading may be done in small groups or in larger groups depending on the ability of the children to attend to the story.
- 5.1 "Many" means at least 3 of each type.
- A wide selection of books include: variety of topics; fantasy and factual information; stories about people, animals, and science; books that reflect different cultures and abilities. Note that all books do not have to be in the book area. They may be located in various areas of the room. Be sure to look for them. A "wide selection" means at least 20 books, but more might be required if there is a large group of children. *Approximately* 3-4 of each type (glasses count as a representation of disabilities), but this rule is flexible and there might be more or less of any category. However, each type must be represented.
- 5.2 Examples of additional language materials are posters and pictures, flannel board stories, picture card games, and recorded stories and songs.
- Examples of appropriate materials and activities include simpler books read with younger children; large print materials for child with visual impairment; books in children's primary language(s); rhyming games for older children. Violence or other frightening content in books and pictures is not appropriate for preschool/k children because they can't distinguish between fantasy and reality. Older children are more likely to be able to handle this type of content. However, if there are any books accessible to children that show violence in a graphic or frightening way, or that glorify violence, then credit cannot be given for this indicator.
- 5.5 Informal reading must be observed at least once to get credit for this indicator.

- 1.2 "Individual expression" means that each child may select the subject matter and/or art medium, and carry out the work in his or her own way. A number of paintings, each of which is different because the children have not been asked to imitate a model or assigned a subject to paint, is considered "individual expression."
- 3.1 In groups with children under 3 or with certain developmental delays, staff may bring out materials to make them accessible daily with close supervision for as long as there is interest. Some adaptations may be needed to make art materials accessible and usable for children with disabilities.
- 5.1 "Many" requires that some materials be accessible from at least 4 of the categories for a substantial portion of the day, and drawing materials are required as 1 of the 4.
- Observe to see whether the children have access to the art materials and if they actually use them in their own creative way. You may also look at the art work displayed in the room. If you see many teacher directed projects displayed, and little individual work being done by the children during the observation, do not give credit for this indicator. If you are not sure, ask the teacher how often projects like those in the display are done. If projects that meet the requirements of 3.2 are used no more than once or twice a week, and you observe many instances of children using art materials in their own, creative way, you may give credit for this indicator, even if much of the work displayed is of the "project" variety. Additional questions such as, "How do you choose what to put on the bulletin board?" may also be helpful.

- Dress-up clothes should include more than the high-heeled shoes, dresses, purses, and women's hats commonly found in a playhouse area. Two to three gender-specific examples of clothing worn by both men and women at work such as hardhats, transportation worker caps, and cowboy hats, as well as running shoes, clip-on ties, and jackets, and purses or flowery hats, should be included.
- 5.2 Consider materials both indoors and outdoor when calculating accessibility for a substantial portion of the day.
- 5.3 Consider small toys that children can pretend with, both indoors and outdoors, when scoring this indicator (e.g., small dolls, trucks, animals, etc.).
- Organized storage means that materials of the same type (e.g., dolls, dress-ups, cooking props, food props, etc.) are generally stored together (e.g., in containers or in furniture). Storage does not have to be perfectly neat.
- 7.2 Consider dolls as props for this indicator.
- 7.3 The intent of this indicator is that children are provided a large enough space so that their dramatic play can be very active and noisy without disrupting other activities.

  A large indoor space such as a gymnasium or multi-purpose room may be substituted for the outdoor space. Structures (such as small houses, cars, or boats) and props for camping, cooking, work, transportation, or dress-up clothes may be available to the children.

- Open-ended nature/science materials that children can explore in their own way are usually developmentally appropriate for a wide range of ages and abilities.

  Materials that require skills beyond the ability of individual children or that do not challenge children sufficiently are not developmentally appropriate. For example, having children fill in the height of the red line on a thermometer to tell hot from cold may be appropriate for kindergartners but not for 2-year-olds.
- 5.1 "Many" means *approximately* 3-5 of each type. However, this can vary, as long as each type is represented. In some cases you might give credit for more than 3-5 of one type and less than 3-5 of another. This will also depend on the ages and number of children in the group.
- 5.4 Must observe one example or see clear evidence, i.e., pictures, drawings.

- Look around the room carefully to find math materials because they might not be organized into a corner. Developmentally appropriate math/number materials allow children to use concrete objects to experiment with quantity, size, and shape as they develop the concepts they need for the more abstract tasks required in later school, such as adding, subtracting, and completing paper and pencil math problems. Whether a material or activity is appropriate is based on the abilities and interests of the children. An occasional math worksheet offered to kindergartners who have many other concrete materials to manipulate may be developmentally appropriate for them, but not for 2- and 3-year-olds.
- The types of materials (listed in the note for clarification in the book) are: "counting, measuring, comparing quantities, recognizing shares, becoming familiar with written number." "Many" means approximately 3-5 of each type. However, this can vary, as long as most types are represented. In some cases you might give credit for more than 3-5 of one type and less than 3-5 of another. This will also depend on the ages and number of children in the group.
- The intent of this indicator is for adults to link math and numbers to practical life events in the children's daily schedule. Therefore, look for use of numbers during meals or getting ready for meals (such as setting the table), transition times, using a timer to take turns, counting who is absent, arriving/leaving, etc. Do not count play activities such as number games or computer games in determining the score for this indicator. "Number talk" or number experiences as part of practical life events should be observed *more than once* during the observation to give credit for this indicator.

- 1.1 & 3.1 To judge whether materials are non-violent and culturally sensitive, we need to consider the content of the materials. Unfortunately, many children's videos or TV programs contain violence and are therefore inappropriate even though they have been created for the children's market. This may include some natural wildlife productions and cartoons.
- 3.3 The intent of this indicator is to ensure that children participate in play in which they can actively be creative, imaginative, and have hands-on experiences with real materials rather than spending inordinate amount of time watching TV or playing computer games. The amount of time given in the example is a general indiction of a required time limitation and can vary. When deciding whether adequate limits are set on amount of time children can use computer, consider not just how long each child's turn is, but also the number of turns each child is allowed to have, and if children spend time watching others at the computer. Computer time should be relatively short, compared to other activities.

- When assessing diversity in materials, consider all areas and materials used by children, including pictures and photos displayed, books, puzzles, games, dolls, play people in the block area, puppets, music tapes, videos, and computer software.
- Score yes only if there is obvious, deliberate, and repeated prejudice shown. Do not score yes if an example of "politically incorrect" or "culturally insensitive behavior" is observed, i.e., teacher asks children to "sit Indian style." However, in order to sensitize the staff, any such instance should be mentioned. For example, in the NCR Rated License summary report, or in any other technical assistance associated with the scales.
- 3.2 If stereotyping or violence is shown with regard to any group, such as some "Cowboy and Indian" toys, then this indicator should be scored No. Gender equity should also be considered here. Portrayals of men/boys doing traditionally male activities and women/girls doing traditionally female activities are acceptable. However, do not give credit if gender stereotyping is portrayed negatively in any way.
- For this indicator, there need to be many books, many pictures, and many materials, and *all* categories of diversity listed need to be included to some degree. However, there do not need to be many examples of each category. Materials must be located in spaces children use for a substantial portion of the day. Materials located in spaces used only for relatively short periods (e.g., hallways, entry way, lunch room, early AM or late PM classroom) are not counted to meet the requirements of this indicator.
- 5.2 Examples include different kinds of dolls, puppets and block/dramatic play people.
